RE: Comments in Docket No. 911-017/PI-116

Dear Commissioners:

During its June 26, 2006 meeting, the Enhanced Wireless 911 Advisory Board (Board) considered the proposed Interim Implementation Policy released for comment in Docket No. 911-017/PI-116 and makes the following recommendations:

With respect to paragraph three (3), the Board recommends that it read as follows:

The Commission will not fund any Phase II requests pending the implementation of the LB 1222 funding mechanism. Completion of Phase I remains the top priority of the Commission. Replacement of obsolete equipment will be handled by a case-by case basis. However, Phase I funding requests from those PSAPs who are prepared to accept Phase II calls and wish to implement Phase I and Phase II simultaneously at no additional cost to the Fund will be given priority over all other Phase I requests. The Commission will adopt appropriate Phase II testing standards that must be followed regardless of whether funding for Phase II is sought.

The Board recommends that paragraph four (4) be amended as follows:

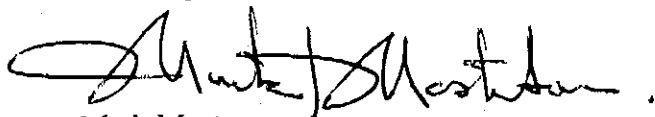

All previously approved, pending and new funding requests must be allocated between wireless and landline 911 service at a reimbursement rate of sixty percent (60%) for wireless.

The Board further recommends that paragraph 5 be modified to read:

Pending the implementation of the LB1222 funding mechanism, funding requests for maintenance of equipment hardware/software will not be considered for funding.

The Board has no objections with respect to the remaining paragraphs. We ask that these comments be made part of the official record in the above-mentioned docket.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Masterton". The signature is fluid and cursive, with a large initial "M" and a long, sweeping underline.

Mark Masterton
Chairman
